

BUILD TOGETHER

Fairytale palace

105 pieces / 29 steps

Four turrets, a purple roof and a wide terrace make a palace for a longer building session. Work around the towers together, then add the central hall and entrance.

A little model, a little story

Choose a name for the palace.

Plan a celebration on the terrace.

Tell a story that starts with a knock at the tall doorway.

Digital guide; no bricks included. Make it together with an adult.

GETTING STARTED

Before you build

Match the shapes

Compare each part with its picture and count its rows of studs. A square brick has two rows of two studs; a long brick has two rows of four. Use the full parts list for the exact shapes and quantities.

Follow the colours

Match the shapes and quantities. The pictures show our colours. Colour names in the steps refer to the pictures. Keep contrasting colours where they help you recognise the model.

Count the studs

The bumps on top are called studs. Count them when a step asks for a gap or an overhang. Put the build on a flat surface and keep its front facing the same way as in the pictures.

Add a little at a time

New pieces keep their colour in each step. Earlier pieces look lighter so you can see what has changed. Each list tells you exactly what to add.

Build together

An adult can read the steps while a child finds the pieces. The counts are for this one model. For two models to stay built, add their parts lists together.

About this build

This is the largest guide in the library. Leave room to keep it in place between sessions. The windows and doorway are open frames.
