

BUILD TOGETHER

Grand viaduct

66 pieces / 11 steps

Rows of cream arches support a long raised walkway. Build the matching pillars and join them with the deck for a satisfying larger project.

A little model, a little story

Count the arches from both sides.

Imagine what lies beneath the bridge.

Tell a story about someone crossing the walkway.

Digital guide; no bricks included. Make it together with an adult.

GETTING STARTED

Before you build

Match the shapes

Compare each part with its picture and count its rows of studs. A square brick has two rows of two studs; a long brick has two rows of four. Use the full parts list for the exact shapes and quantities.

Follow the colours

Match the shapes and quantities. The pictures show our colours. Colour names in the steps refer to the pictures. Keep contrasting colours where they help you recognise the model.

Count the studs

The bumps on top are called studs. Count them when a step asks for a gap or an overhang. Put the build on a flat surface and keep its front facing the same way as in the pictures.

Add a little at a time

New pieces keep their colour in each step. Earlier pieces look lighter so you can see what has changed. Each list tells you exactly what to add.

Build together

An adult can read the steps while a child finds the pieces. The counts are for this one model. For two models to stay built, add their parts lists together.

About this build

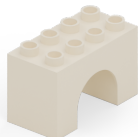

This is a model bridge with fixed rails. No matching vehicle clearance has been checked.
