

BUILD TOGETHER

Forklift with fixed forks

20 pieces / 12 steps

Make a little forklift with fixed forks, an open mast and a parcel you can lift off by hand.

A little model, a little story

Lift the brown parcel off the forks by hand.

Park beside the loading dock and stack it on the dock parcel.

Take turns sending and receiving a pretend delivery.

Build together with an adult. No bricks included.

GETTING STARTED

Before you build

Find the pieces

Match the shapes and quantities. The pictures show our colours. Use the pictured part and stud dimensions to find the same shape.

Count the studs

Studs are the round bumps on top. Count the lines of studs across and along a piece. When a step leaves a clear row or column, keep that space empty. Match the picture to keep the model facing the same way.

Follow the colour

New pieces keep their colour in each step. Earlier pieces are lighter so you can see what to add. The finished-model picture shows all the colours together.

Choose how to play

Choose one model and check its pieces first. Take it apart to reuse those pieces for another model. Pack-wide lists are optional planning tools; the exact-colour list follows the pictured palette.

Exact parts checklist

Match the shapes and quantities. The pictures show our colours. Colour names in the steps refer to the pictures. Keep useful contrasts, such as a light belly against a dark body. Compare your wheeled base with the picture before starting. We have not confirmed every real chassis and wheel version. Match the pictured shapes and part numbers to your bricks.

Chassis with attached wheels counts as one assembled piece.
