

Choose a discovery

1. Follow the three horns

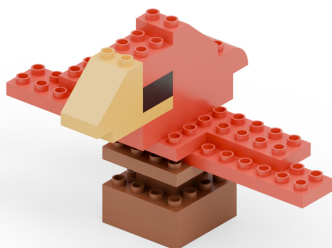

Count the horns, then draw a leafy breakfast for your dinosaur. Make a trail towards a paper watering hole.

2. Count the back plates

Follow the orange plates from the long tail to the little head. Take a slow walk around your paper landscape.

3. Look from the rocky perch

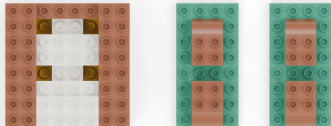

Stretch out your arms to copy the fixed wings. Invent three things your prehistoric flyer can see from its rock.

Use the separate building guides and inventories. Bricks are not included.

Choose a discovery

4. Uncover a fossil

Lift one grassy cover, then the other. Find the skull, ribs and backbone. Draw the dinosaur you imagine these pretend bones belonged to.

5. Make a leafy resting place

Draw a path around the grove. Choose a resting place beside the plants and tell a story about a tiny visitor.

6. Reveal the lava

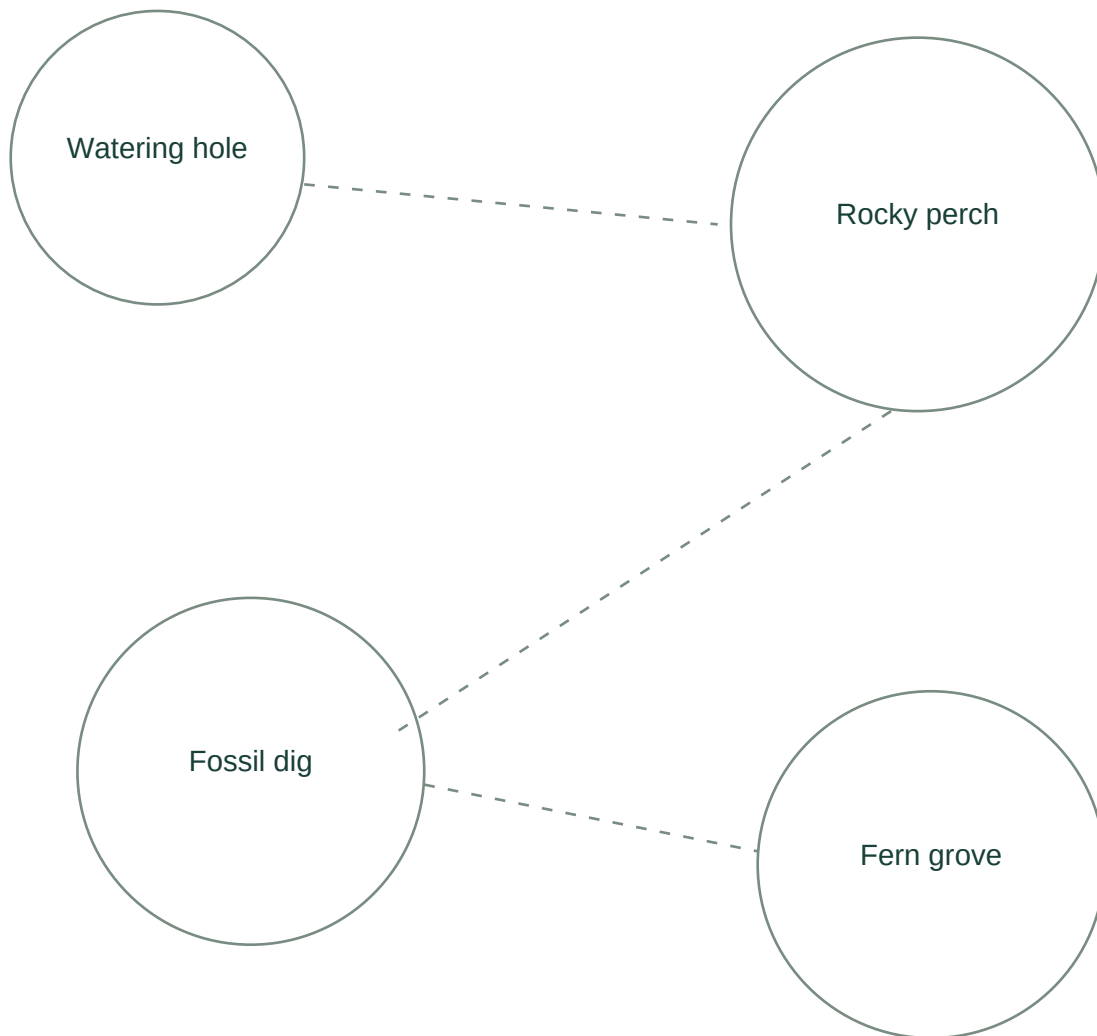

Count down, then lift the complete lava core by hand. Draw a lava path and move the dinosaurs to a clear resting place.

Use the separate building guides and inventories. Bricks are not included.

Your prehistoric landscape

Place this beside your builds. Draw a route, name the places and invent something to discover. The map is scenery; it is not a scale plan.

What happens next?

Draw a new place and give your explorers a mission of your own.

Gather your dinosaur pieces

All six dinosaur builds together need the quantities below, including both fossil covers and the lava core. One at a time uses the largest quantity for each exact shape and colour. Colours are not interchangeable by default.

Green 4 × 8 plate: 2 one at a time / 6 together
