

Flying saucer

42 pieces | 16 steps

A broad yellow saucer rests on three feet. Lift its blue lid and let the Moon alien ride in the open cockpit, antennae pointing towards the stars.

Before you build

Find the right shape

Match the shape, size and colour to the parts pictures. A stud is a round bump on top. Count rows and columns from one edge.

Follow the pictures

New pieces keep their full colour. Earlier pieces are lighter. Keep the front of the model facing you unless a step says to turn it.

Build and play together

Gather all the pieces first, then take each step at your own pace. Help your child press pieces together and lift removable parts gently.

Gather pieces

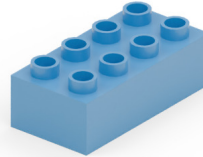

Colours show the pictured version. Brown represents Reddish Brown. Match shapes and quantities first; other colour choices have not been checked for this edition.

Shape-only checklist

Use this list to check the shapes and total quantities. Colours stay as listed on the previous pages.

[] $2 \times 4 \times 8$ plate

[] $2 \times 2 \times 4$ brick

[] $3 \times 2 \times 8$ plate

[] $2 \times 2 \times 4$ plate

[] $1 \times 4 \times 4$ round plate

[] $4 \times 8 \times 4$ semicircular plate

[] $12 \times 2 \times 2$ sloping brick

[] $4 \times 2 \times 2$ brick

[] $12 \times 1 \times 2$ double-height wall brick

Total: 42 pieces

The lid lifts off as one piece; it does not hinge. Leave it off while the alien is aboard.

The Moon alien is a separate build with its own guide and inventory. Its antennae stand above the cockpit.

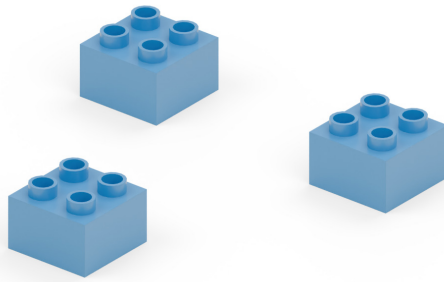

Move the craft by its lower body. The three feet are fixed.

Optional companion: the complete 16-piece Moon alien guide follows at the back of this PDF. Add those 16 pieces if you are building both together.

Build

Step 1 of 16

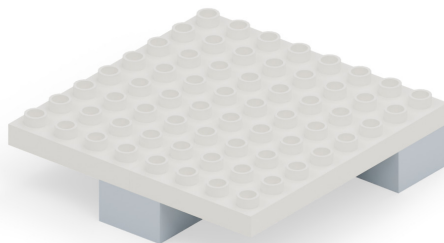

3 × blue 2 × 2 brick

Set out three blue square bricks: two at the back and one centred at the front. Leave four clear columns between the back pair and four rows before the front foot.

Step 2 of 16

2 × white 4 × 8 plate

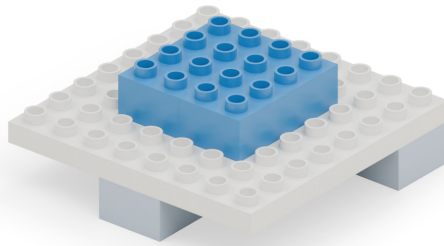

Lay two white 4 × 8 plates side by side across the feet. The plates meet down the middle.

Build

Step 3 of 16

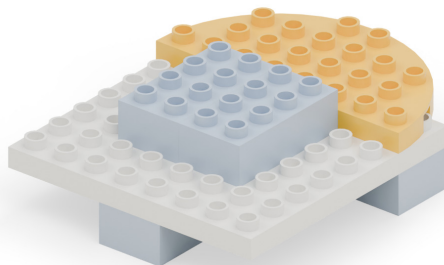

2 × blue 2 × 4 brick

Put two blue 2 × 4 bricks side by side in the middle of the floor, running from back to front. Leave two rows or columns clear around all four sides. This raised seat keeps the alien's face above the cockpit rim.

Step 4 of 16

1 × yellow 8 × 4 semicircular plate

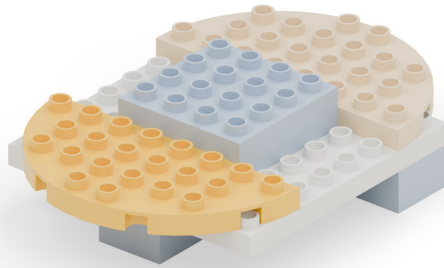

Attach a yellow semicircular plate beyond the back edge. Its straight edge faces forwards and its inner two rows overlap the floor.

Build

Step 5 of 16

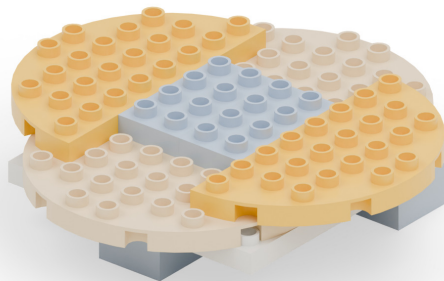

1 × yellow 8 × 4 semicircular plate

Add the matching yellow semicircle at the front, with its straight edge facing back. Again, overlap the floor by two rows.

Step 6 of 16

2 × yellow 8 × 4 semicircular plate

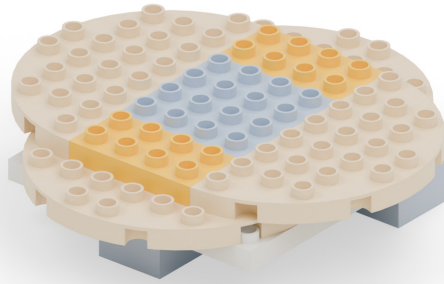

Add yellow semicircles at the left and right. Their straight edges face the middle; overlap each side of the floor by two columns.

Build

Step 7 of 16

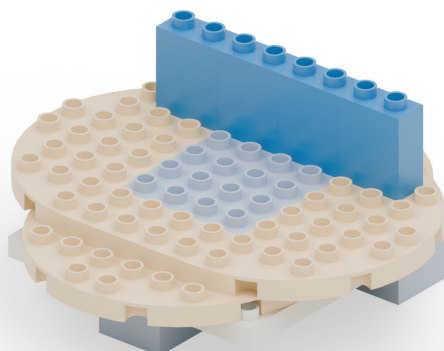

2 × yellow 2 × 4 plate

Join the rim layers with yellow 2 × 4 plates across the middle of the back and front rims. These fill the gaps between the side semicircles.

Step 8 of 16

4 × blue 1 × 2 double-height wall brick

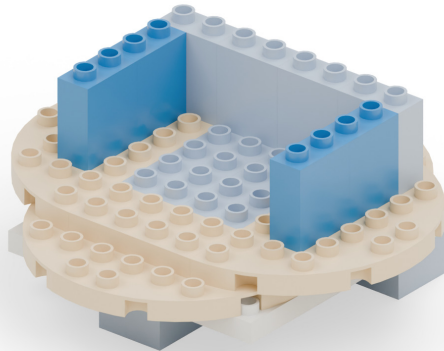

Build the back wall across the yellow rim with four blue narrow double-height wall bricks. Leave one row behind the wall.

Build

Step 9 of 16

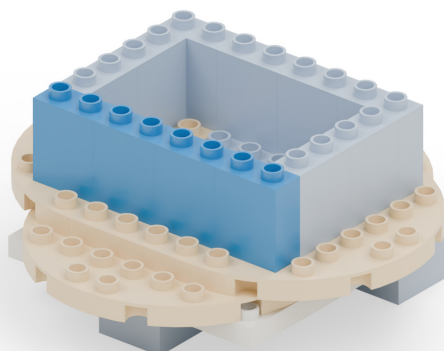

4 × blue 1 × 2 double-height wall brick

Add two blue wall bricks down each side, leaving the six-column-wide centre open.

Step 10 of 16

4 × blue 1 × 2 double-height wall brick

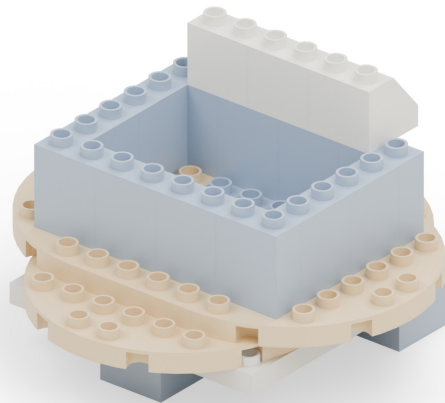

Finish the front wall with four more blue wall bricks across the rim.

Build

Step 11 of 16

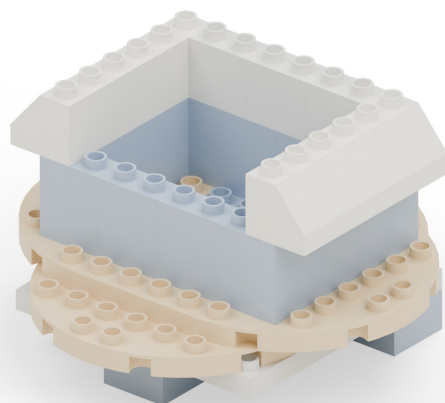

3 × white 2 × 2 sloping brick

Put three white slopes along the back wall, centred left to right. Their high edges face towards the middle of the cockpit.

Step 12 of 16

6 × white 2 × 2 sloping brick

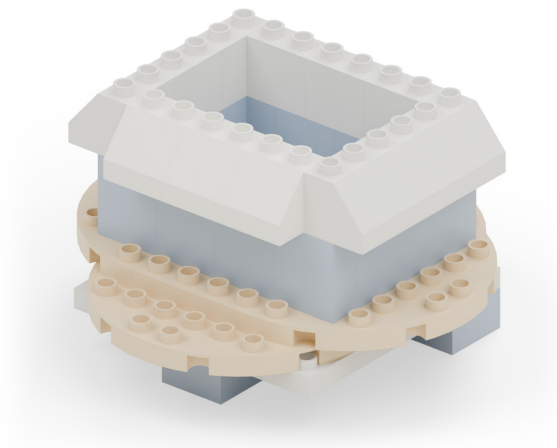

Put three white slopes along each side. Their high edges face inwards; one column projects outside each blue side wall.

Build

Step 13 of 16

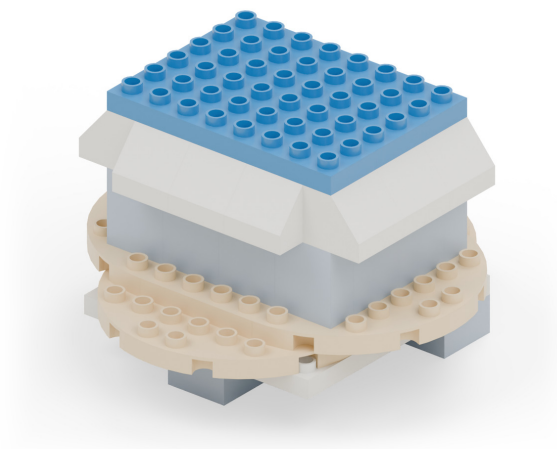

3 × white 2 × 2 sloping brick

Finish the sloping cockpit with three white slopes at the front, high edges facing back towards the opening.

Step 14 of 16

3 × blue 2 × 8 plate

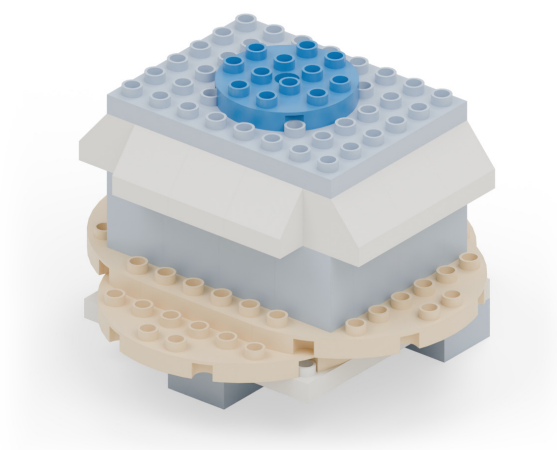

Close the empty cockpit with three blue 2 × 8 plates across the opening, side by side. Their edges rest on the high edges of the slopes. This lid comes off when the alien rides aboard.

Build

Step 15 of 16

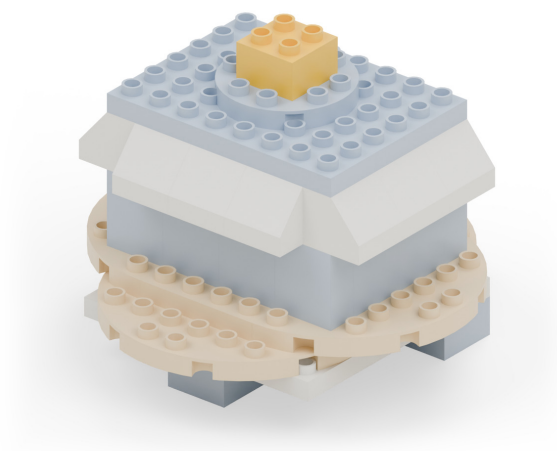

1 × blue 4 × 4 round plate

Join the cover plates with a blue round plate in the middle.

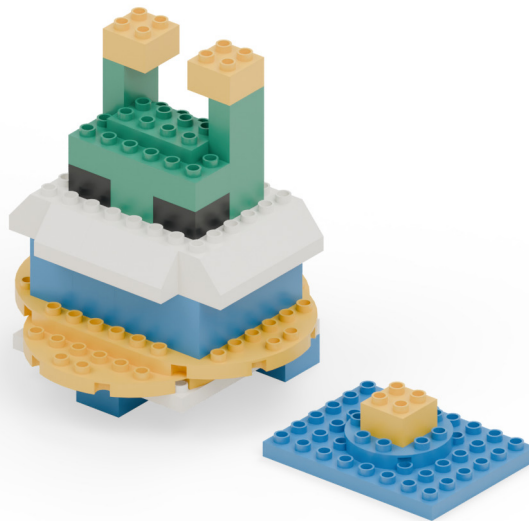

Step 16 of 16

1 × yellow 2 × 2 brick

Finish with a yellow square brick in the centre as a low cockpit beacon.

Ready to play

Lift off the lid before putting the Moon alien aboard. Its antennae stay above the open cockpit; replace the lid only after taking the alien out. The complete companion guide and parts list are included.

1. Lift off the lid and invite the Moon alien aboard for an open-cockpit journey.
2. Land on a paper planet and ask what the visitor has found.
3. Take the alien out, then replace the lid to park the empty craft.

The lid lifts off as one piece; it does not hinge. Leave it off while the alien is aboard.

The Moon alien is a separate build with its own guide and inventory. Its antennae stand above the cockpit.

Move the craft by its lower body. The three feet are fixed.

Moon alien

16 pieces | 10 steps

Two big dark eyes and yellow-tipped antennae give this green moon visitor a face of its own. Its broad head sits above a small body and two rounded feet.

Before you build

Find the right shape

Match the shape, size and colour to the parts pictures. A stud is a round bump on top. Count rows and columns from one edge.

Follow the pictures

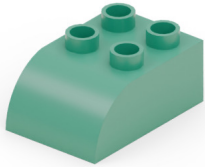

New pieces keep their full colour. Earlier pieces are lighter. Keep the front of the model facing you unless a step says to turn it.

Shape-only checklist

Use this list to check the shapes and total quantities. Colours stay as listed on the previous pages.

[] $2 \times 2 \times 3$ curved brick

[] $4 \times 2 \times 6$ brick

[] $2 \times 2 \times 4$ plate

[] $6 \times 2 \times 2$ brick

[] $2 \times 1 \times 2$ double-height wall brick

Total: 16 pieces

The eyes use plain black bricks. The antennae, head and feet are fixed.

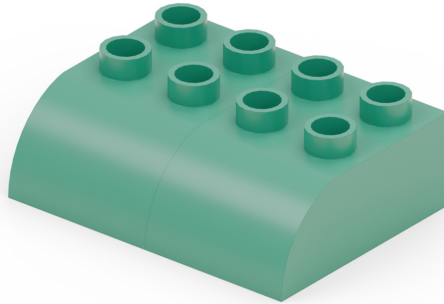

Use the matching enlarged Flying saucer and Moon-base hideaway guides for this alien.

Lift the alien gently by its body, with a hand underneath its feet.

Build

Step 1 of 10

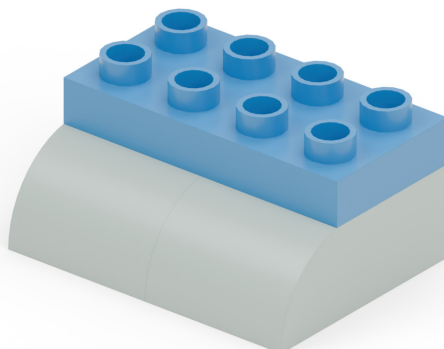

2 × green 2 × 3 curved brick

Place two green curved bricks side by side, with their rounded ends towards you.

Step 2 of 10

1 × blue 2 × 4 plate

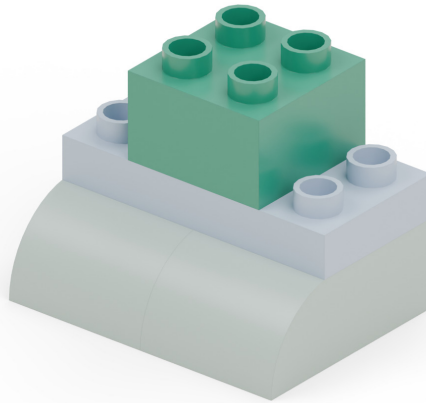

Join the feet with a blue 2 × 4 plate across their back two rows.

Build

Step 3 of 10

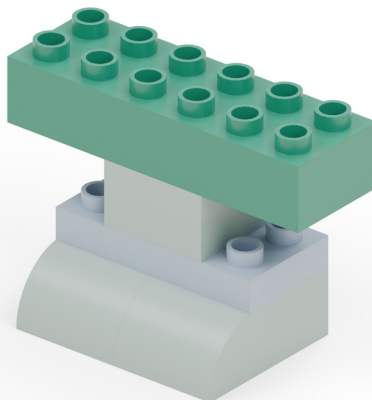

1 × green 2 × 2 brick

Centre a green square brick on the blue plate. Leave one blue column showing on each side.

Step 4 of 10

1 × green 2 × 6 brick

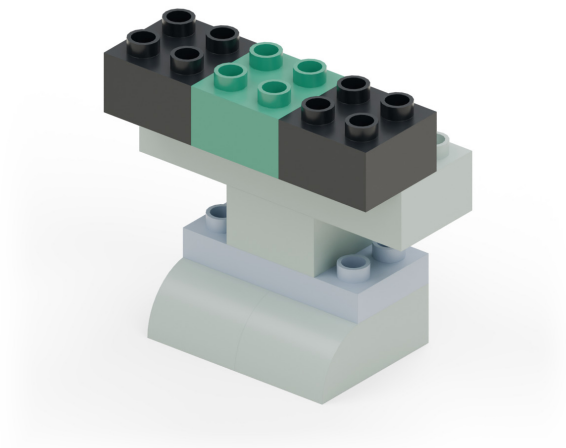

Centre a green 2 × 6 brick across the body. It projects two columns on each side to make the broad bottom of the head.

Build

Step 5 of 10

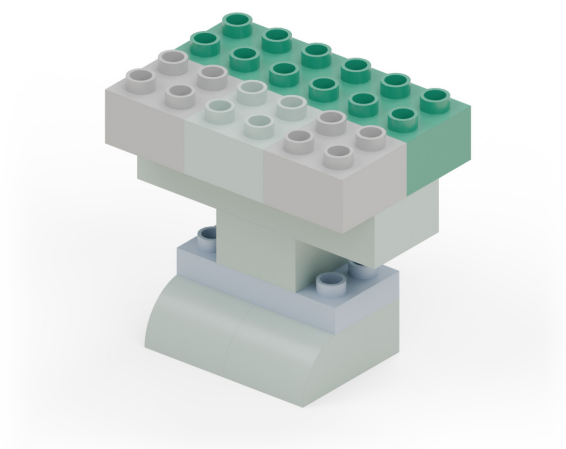

2 × black 2 × 2 brick; 1 × green 2 × 2 brick

Put a black square at each end of the jaw and a green square between them. Their back rows sit on the front row of the jaw; the front rows project towards you.

Step 6 of 10

1 × green 2 × 6 brick

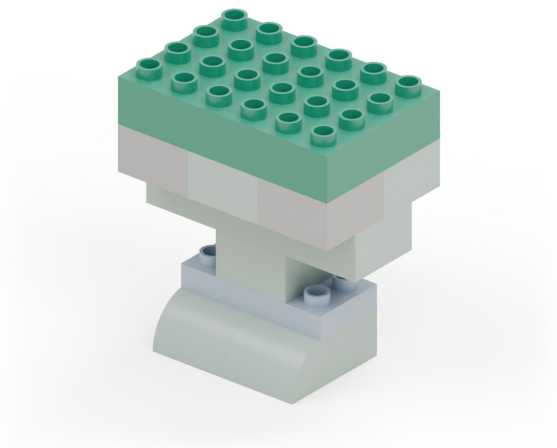

Put a green 2 × 6 brick across the back half of the jaw, level with the eyes. It projects one row backwards.

Build

Step 7 of 10

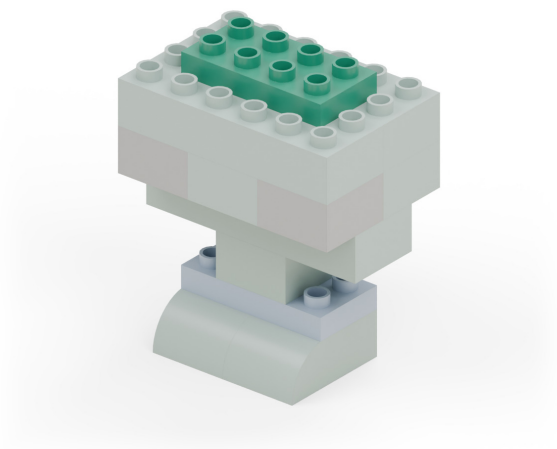

2 × green 2 × 6 brick

Cover the head with two green 2 × 6 bricks, one behind the other, lined up with the eyes and back of the head.

Step 8 of 10

1 × green 2 × 4 plate

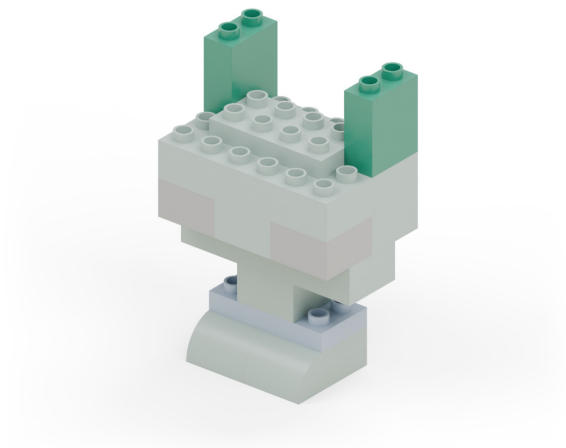

Join the two top bricks with a green 2 × 4 plate across their middle. Leave one column clear at each end and one row at the back and front.

Build

Step 9 of 10

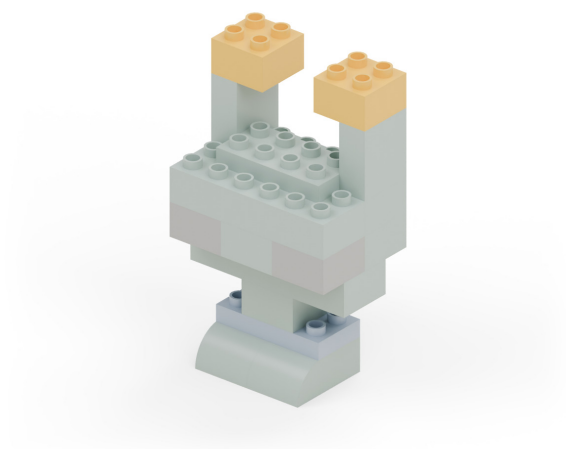

2 × green 1 × 2 double-height wall brick

Stand a green narrow double-height wall brick along each outside column at the back of the head. Each runs over the back two rows.

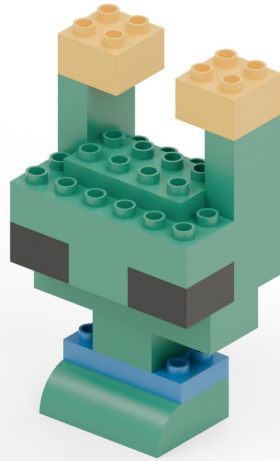

Step 10 of 10

2 × yellow 2 × 2 brick

Put a yellow square on each antenna. Line up the outside edges with the head, so each yellow square projects one column towards the middle.

Ready to play

1. Invent a greeting and a name for your moon visitor.
2. Point the antennae towards three things on a paper planet and explain what they are.
3. Let the alien travel in the Flying saucer, following its companion guide.

The eyes use plain black bricks. The antennae, head and feet are fixed.

Use the matching enlarged Flying saucer and Moon-base hideaway guides for this alien.

Lift the alien gently by its body, with a hand underneath its feet.
